# Following Birds to Our Work

By connecting the work of the Audubon network—chapters, campus chapters, centers and sanctuaries, national and state staff, volunteers, U.S. and international partners, and other supporters along each of the flyways of the Americas—Audubon weaves a seamless web of conservation across the hemisphere.

## Hemispheric Reach

Each spring and fall, billions of migratory birds follow flyways from wintering to breeding grounds and back again. By protecting the web of life that represents America's richest veins of biodiversity, Audubon is safeguarding our great natural heritage for future generations, preserving our shared quality of life, and fostering a healthier environment.

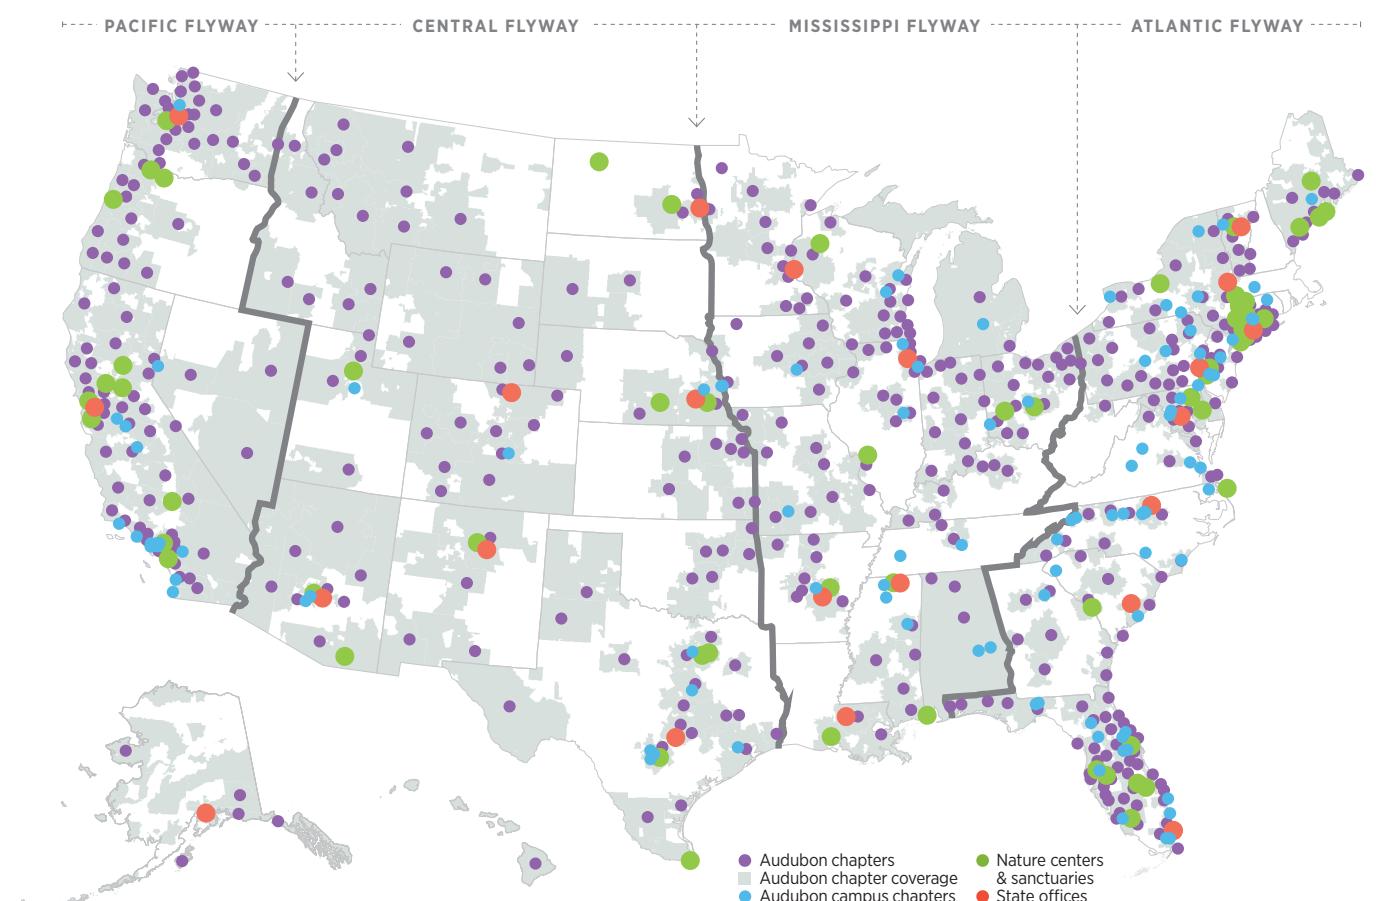

## International Partnerships

Audubon is proud to be the BirdLife International partner for the United States. We work with local governments and NGOs in the Caribbean and Latin America to ensure birds are protected at every stage of their life cycle and migratory path. We collaborate with partners to build bird-based tourism programs, foster grassroots actions on climate change issues, and provide conservation policy and capacity development.

## Grassroots Everywhere

### State Programs

Audubon's 22 state and regional offices are highly effective agents at statehouses across America, and many provide statewide leadership for chapters, campus chapters, and centers. State offices deliver on-the-ground results throughout the flyways.

### Centers & Sanctuaries

Audubon's 34 nature centers and 23 sanctuaries encompass vital habitats where we're educating the next generation of conservationists—inspiring them to join in protecting these iconic landscapes.

### Chapters

Audubon's 452 chapters are more than our face across the continent; they are hubs of conservation in local communities. As full partners in our Strategic Plan, chapters are a powerful force for advocacy, education, and engagement.

### Campus Chapters

Audubon is on 112 campuses helping students become the next generation of conservationists and supporting them as they engage in conservation and advocacy. Audubon provides leadership training, mentorship, and pathways to sustainable careers.

### Collaborations

Audubon collaborates with BirdLife International and a network of international partners that serve as key contributors to a shared vision of bird and habitat conservation across the Americas.

# Maximizing Our Impact

To leverage the power of Audubon, we follow a tight framework of strategic conservation priorities. This focus allows us to most effectively collaborate and coordinate our conservation efforts across flyways and the hemisphere.

	<b>Strategic Priorities</b>	<b>Goals</b>	<b>Pacific Flyway</b>	<b>Central Flyway</b>	<b>Mississippi Flyway</b>	<b>Atlantic Flyway</b>
	<b>Coasts</b> Audubon utilizes science, policy, restoration, and engagement to increase coastal resilience, protect marine resources, and steward beach sites for birds and coastal communities.	<ul style="list-style-type: none"> <li>• Increase the populations of 16 flagship species at 500 priority sites.</li> <li>• Guide \$1 billion to Gulf of Mexico bird habitat restoration priorities.</li> </ul>	<ul style="list-style-type: none"> <li>• Arctic</li> <li>• Grays Harbor</li> <li>• San Francisco Bay</li> <li>• Southern California Coast</li> <li>• Panama Bay</li> <li>• Chiloé Island, Chile</li> </ul>	<ul style="list-style-type: none"> <li>• Island Sanctuaries of Texas</li> <li>• Gulf of Mexico</li> </ul>	<ul style="list-style-type: none"> <li>• Gulf of Mexico</li> <li>• Mississippi River Delta</li> </ul>	<ul style="list-style-type: none"> <li>• Maine Islands</li> <li>• Long Island Sound</li> <li>• Coastal Carolinas</li> <li>• North/Central Florida Coast</li> <li>• Bahama Islands</li> <li>• Gulf of Mexico</li> </ul>
	<b>Working Lands</b> Audubon collaborates with landowners, land managers, government agencies, and private industry across the hemisphere to increase the quality of habitat on privately managed lands.	<ul style="list-style-type: none"> <li>• Increase or stabilize the populations of 20 flagship bird species in four priority landscapes.</li> <li>• Get 10,000 landowners to pledge to adopt bird-friendly practices.</li> </ul>	<ul style="list-style-type: none"> <li>• Central Valley, California</li> </ul>	<ul style="list-style-type: none"> <li>• Northern Great Plains</li> <li>• Sagebrush Ecosystem</li> <li>• Southern Great Plains</li> </ul>	<ul style="list-style-type: none"> <li>• Eastern Tallgrass Prairies</li> </ul>	<ul style="list-style-type: none"> <li>• Eastern Forests</li> </ul>
	<b>Water</b> Audubon engages and involves the public on issues surrounding water rights and water quality; restores habitats along rivers, wetlands, and deltas; and explores and implements market-based solutions that contribute to the achievement of our water goals.	<ul style="list-style-type: none"> <li>• Manage, protect, and restore more than one million acres of habitat in watersheds.</li> <li>• Engage 250,000 people in advocacy on local water-conservation measures.</li> </ul>	<ul style="list-style-type: none"> <li>• Salton Sea</li> <li>• Desert Salt Lakes</li> </ul>	<ul style="list-style-type: none"> <li>• Colorado River Basin and Delta</li> <li>• Great Salt Lake</li> <li>• Platte River</li> </ul>	<ul style="list-style-type: none"> <li>• Great Lakes</li> <li>• Upper Mississippi River Basin</li> </ul>	<ul style="list-style-type: none"> <li>• Everglades</li> <li>• Delaware River Basin</li> </ul>
	<b>Bird-Friendly Communities</b> Audubon protects bird populations in America's cities and towns by providing food, shelter, safe passage, and places for birds to raise their young. Communities meet those needs through individual and collective actions—actions that also contribute to more sustainable human societies.	<ul style="list-style-type: none"> <li>• Address local threats to birds and connect people to conservation actions.</li> <li>• Grow one million bird-friendly plants by working with volunteers and local governments.</li> </ul>	<p>Using local expertise and creativity, the Audubon network identifies local opportunities to help birds and communities thrive through a wide range of programs and activities. Bird-Friendly Communities also provides the expertise and platform to coordinate engagement across the other core strategies.</p>			
	<b>Climate</b> Audubon leverages our climate science to create far greater demand for change on the climate issue by tapping into people's passion for birds.	<ul style="list-style-type: none"> <li>• Implement adaptation strategies on 300,000 acres of coastal wetlands and marshes.</li> <li>• Bring one million new people to the climate issue through outreach and advocacy efforts.</li> <li>• Secure 10 new state-based climate policy victories.</li> </ul>	<p>Leveraging our climate science, Audubon follows people's passion for birds to create a greater demand for change at the local, state, national, and hemispheric levels. Focused conservation policy priorities and targeted engagement initiatives that mix individual and collective action will bring one million Americans to the climate conversation during the next five years.</p>			

FROM DAVID YARNOLD

# New Decade. New Audubon.

**Audubon President and CEO David Yarnold  
reflects on four key themes for 2020.**

**“**Audubon is needed—and leading—as never before. We’re identifying the increasingly grave threats facing birds (and people) throughout the Western Hemisphere, from harmful policies to climate change. We’re also building an unprecedented, diverse coalition of birders and businesspeople, conservationists and decision-makers from across the country to protect the birds we love and the places they rely on. Audubon’s growing network is better positioned than ever to drive positive change locally, nationally, and internationally. Here are just a few of the ways we’re getting it done.”

Migrating Sandhill Cranes fly across a rainbow as an evening thunderstorm wanes in Nebraska's Platte River Valley, home of Audubon's Rowe Sanctuary.

# Shining a Spotlight on the Climate Crisis

**Audubon's latest climate report, *Survival by Degrees*, localizes the threat of climate change as no one else can—and the world takes notice.**

“It’s hard to look back on the past year without immediately thinking of the ever-growing danger posed by the climate crisis. More and more, climate-related issues affect all we do. From extreme flooding and wildfires worldwide to the loss of three billion birds in our lifetime, the impact of our changing climate on birds (and the places they need) has become irrefutable and inescapable—and this relationship will only grow stronger in years to come.

In October, Audubon published our most in-depth analysis to date of the climate crisis. *Survival by Degrees* integrated 140 million data points gathered by scientists and birders from across the continent to identify the locations where more than 600 North American bird species nest and breed. We then applied the latest climate models to determine what will happen to these places if current trends persist. The resulting analysis makes for sobering reading: Two-thirds of North American bird species are at risk of extinction if we experience a global increase in temperature of 3 degrees Celsius.

While the report paints a grim picture, it also provides both a measure of hope and a pragmatic path forward. If we can limit temperature increases to 1.5 degrees

Celsius, we can help improve outcomes for 76 percent of those species at risk. Alongside our analysis, we brought this newfound knowledge to life through the innovative Birds and Climate Visualizer tool, which makes it easy for individuals to discover which birds from their backyards are at risk. You can also learn how to help through our Climate Action Guide. By making abstract ideas around climate change tangible, personal, and actionable, Audubon is setting the stage for a groundswell of grassroots momentum that will help fuel a national mandate for sound climate policy.”

## 389

### Species at Risk

Research conducted by Audubon scientists indicates that 389 species, or nearly two-thirds of North American bird species, are at risk of extinction due to climate change.

☞ A displaying Common Loon breaks the mirror-like stillness of a northern Michigan lake.

### The Difference a Degree Can Make

*Survival by Degrees* shows that by stabilizing carbon emissions and holding warming to 1.5°C above pre-industrial levels, 76 percent of vulnerable North American bird species will be better off, and nearly 150 species will no longer be vulnerable to extinction from climate change.

### Climate Change by ZIP Code, by Species

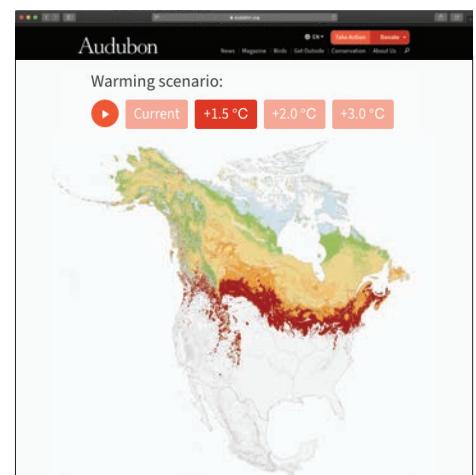

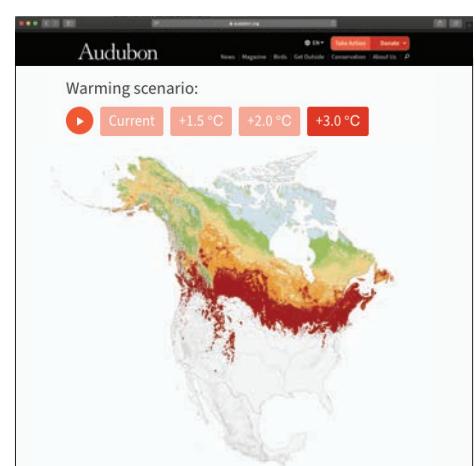

If the temperature rises by 3°C, it's likely we'll no longer hear the call of the loon in the lower 48 during the summer. That's what you can see in our online Birds and Climate Visualizer tool, featured below. Learn which birds in your backyard will be affected—and how you can take action.

Common Loon

# Safeguarding Bedrock Environmental Protections

**While playing defense in D.C., we're winning on clean energy policy in statehouses across the country, from Virginia to Washington State.**

Since 2017, bedrock environmental protections across the country have been under unprecedented and constant attack. We're using every tool at our disposal, from local ordinances and state laws to federal policy, to protect birds and the places they need.

Our reputation as a pragmatic, solutions-driven force for sound environmental policy is raising our profile in Washington, D.C., where we frequently meet with lawmakers, deliver testimony, and help inform new legislation. At the same time, our success in marshaling bipartisan support means we can secure new conservation victories in red, blue, and purple states.

For proof, look no further than 2019. Our network rallied to pass the Solar Access Act in Arkansas and the Energy Freedom Act in South Carolina—making two conservative-leaning states new leaders in the clean energy movement. We also played an important role in the passage of New York and Washington State resolutions to move to 100 percent clean energy over the next 30 years, with New York calling for the greatest reduction in carbon emissions and a first-ever economy-wide climate solution.

## 150,000

**Audubon Advocates**

Over the past year, almost 150,000 Audubon supporters took 600,000 online actions on behalf of birds.

## Preserve and Protect

In Colorado, Audubon joined other conservation organizations to mount a successful effort to suspend the granting of oil and gas leases on parcels of habitat for sage-grouse that were previously under federal protection.

## Fighting on Every Front

As we work to defend the Migratory Bird Treaty Act in Washington, D.C., we've also leveraged our influence in California and Virginia to secure statewide backstop protections for this landmark policy. Doing so helps ensure that bird protections endure in these vital regions, exclusive of developments affecting federal policy.

⌚ A male Greater Sage-Grouse after a long morning of displaying and strutting for a chance to mate on BLM public land in northwest Colorado. This rapidly declining habitat is once again protected, thanks to a successful campaign led by Audubon and partner organizations.

# Engaging the Next Generation of Conservationists

**With a commitment to transforming the face of conservation through youth leadership development, we're creating new pathways for young conservationists.**

Many conservation organizations aspire to create opportunities for young people, particularly young people of color, to join our movement. But few take ownership of changing the face of conservation the way Audubon does. We are focused on cultivating a new generation of energized, diverse conservationists and amplifying their desire to take action, especially around the climate crisis. While there is much to be done, our Leadership Development Initiative is bringing new voices to the table through fellowships, apprenticeships, internships, inclusion-focused programs, and hiring practices that help us deliver on the promise of “Audubon for Everyone,” the theme of our 2019 convention.

The rapid expansion of Audubon on Campus offers another example of how we’re building bridges to a new generation. In just over a year, we’ve grown this program from scratch and scaled it to engage thousands of young people of widely varying backgrounds and interests. We’re now active on more than 100 campuses, which board member Sally Jeffords helped make possible through a generous seed gift.

At the convention in Milwaukee, I met college representatives who are introducing

native plants on campus, advocating for bird-safe buildings, and lobbying their legislators. And unlike most other student organizations, our campus-based groups collaborate actively with local Audubon chapters, bridging the town-gown divide and creating a mutually beneficial relationship that strengthens our grassroots power.

We’re only beginning to realize this program’s potential. In the near future, campus chapters will bring tens of thousands of young people into our movement, along with their passion for nature, fresh ideas, and networks. Taken together, Audubon on Campus and the Leadership Development Initiative represent a new Audubon—one that embodies our nation’s diversity and is poised to address the conservation challenges of tomorrow.”

## 100+

### Campus Chapters

We’re now active on more than 100 campuses, engaging thousands of young people in conservation and advocacy.

Students from Magnolia Grove Audubon at the University of Mississippi and Birds of a Feather at Rust College, an HBCU, take a tour of the Strawberry Plains Audubon Center in Holly Springs, Mississippi.

### A Growing Chorus

Audubon recently received a grant from the Walton Family Foundation that will allow us to establish more chapters at Historically Black Colleges and Universities (HBCUs) and other Minority-Serving Institutions (MSIs).

# Doubling Down on Hemispheric Conservation

We're creating a groundbreaking technology platform that tracks birds' migrations. It will transform the future of conservation, from Canada's boreal forest to the grasslands of Argentina.

**“**Audubon's vision for bird conservation doesn't just stretch from coast to coast; it encompasses the length and breadth of the Western Hemisphere. Because borders don't matter to birds, Audubon launched our landmark Migratory Bird Initiative (MBI) in 2019 to map migratory patterns and identify the most important places for birds from Chile to the Arctic. We project that by the end of 2020, Audubon scientists and affiliated partners will have mapped the journeys undertaken by 300 out of 520 migrating North American bird species.

The MBI will position Audubon to collaborate more effectively with international partners, so that together we can conserve the places most critical to birds, wherever their travels take them. For example, Colombia—the “birdiest” place on Earth—is home to more than 1,900 species. Over the last five years, Audubon has worked with government representatives and on-the-ground partners—including Calidris, our BirdLife partner—to develop a national network of birding trails. These trails have helped conserve 3.6 million acres of land for birds and other wildlife. As part of this ecotourism project, we have trained more than 400 local guides—providing jobs,

fueling economic development, and raising awareness of environmental threats.

Supporting this hemispheric approach requires us to expand our international partnerships. In December, we welcomed Aurelio Ramos to the Audubon team as senior vice president for the International Alliances Program. Aurelio's experience developing innovative agricultural and financing solutions in Latin America and the Caribbean positions him as a strong leader for this vital dimension of Audubon's ongoing conservation work.”

## 520

### Species

The MBI will protect 520 bird species by identifying the migration stopover sites, overwintering grounds, breeding habitats, and other places they need—and thus focusing our work where it matters most.

Tatiana Morales adjusts a spotting scope during a bird guide training in Nariño, Colombia.

### Following the Birds

Through the Western Landbird Migration Project, Audubon is employing migratory science to map critical places for birds along the Colorado River Delta and in California's Central Valley. We plan to use this data to make better-informed—and more impactful—decisions regarding water and habitat management in the Pacific Flyway.

### Colombian Ecotourism Takes Flight

Tatiana Morales (featured here) and other potential birding guides learn how to lead bird tours at Reserva Natural La Planada in Nariño, Colombia. The training, done in partnership with Audubon, will give locals the tools they need to successfully guide tours on the Southwest Andes Birding Trail.

# Audubon Is Breaking Through the Noise

We're speaking for birds more loudly and clearly than ever before. Thanks to your support, we're being heard.

“ In reflecting on our achievements, I'm proud of the work we've done, but I'm most excited when I consider what it means for the future. Fueled by a deep-seated passion for birds, guided by sound science, and inspired by the energy of new and younger members, we can change the laws of the land, the field and the face of conservation, and the future for birds. Onward.

I hope you'll continue to make your voice heard and keep lending your support to Audubon. Thank you for all that you do to help safeguard birds and the places they need.

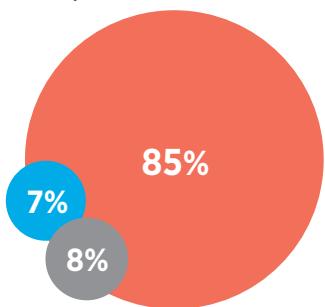

You are what hope looks like to a bird.”
